SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £29 net (US $66 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 162–173, 1986, is £334 (US $760 in the USA and Canada) for institutions; £167 (US $380) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Volume 162 January 1986

CONTENTS

Spectral solutions for three-dimensional triple-deck flow over surfac topography. P. W. Duck and O. R. Burggraf *page* 1

The effect of rotation on double-diffusive interleaving. Oliver S. Kerr and Judith Y. Holyer 23

Plane potential flows past doubly periodic arrays and their connection with effective transport properties. F. K. Lehner 35

Radiation of solitons by slender bodies advancing in a shallow channel. C. C. Mei 53

Structure of transitionally rough and fully rough turbulent boundary layers. Phillip M. Ligrani and Robert J. Moffat 69

The evolution of resonant water-wave oscillations. Edward A. Cox and Michael P. Mortell 99

On the filling of a rotating cylinder with a mixture. M. Ungarish and H. P. Greenspan 117

Electrophoresis of gas bubbles in a rotating fluid. J. D. Sherwood 129

On the time development of meander bends. Gary Parker and Edmund D. Andrews 139

The sedimentation of one sphere past a second attached to a wall. K. Małysa, T. Dąbrós and T. G. M. van de Ven 157

A general wave equation for waves over rippled beds. James T. Kirby 171

On the gradual reflection of weakly nonlinear Stokes waves in regions with varying topography. James T. Kirby 187

Influence of timescale ratio on scalar flux relaxation: modelling Sirivat & Warhaft's homogeneous passive scalar fluctuations. Tsan-Hsing Shih and John L. Lumley 211

The downstream flow beyond an obstacle. P. M. Naghdi and L. Vongsarnpigoon 223

Experimental study of the influence of wind on Benjamin–Feir sideband instability. Larry F. Bliven, Norden E. Huang and Steven R. Long 237

Energetics and optimum motion of oscillating lifting surfaces of finite span. Ali R. Ahmadi and Sheila E. Widnall 261

Experimental analysis of the pressure field induced on a square cylinder by a turbulent flow. J. P. Huot, C. Rey and H. Arbey 283

The evolution of grid-generated turbulence in a stably stratified fluid. E. C. Itsweire, K. N. Helland and C. W. Van Atta 299

The structure of the vorticity field in turbulent channel flow. Part 2. Study of ensemble-averaged fields. JOHN KIM and PARVIZ MOIN 339

Chaotic motions in a weakly nonlinear model for surface waves. PHILIP HOLMES 365

Burst detection with single-point velocity measurements. D. G. BOGARD and W. G. TIEDERMAN 389

On the fine structure of osmosis including three-dimensional pore entrance and exit behaviour. ZONG-YI YAN, SHELDON WEINBAUM and ROBERT PFEFFER 415

On the magnitude of the subgrid-scale eddy coefficient in large-eddy simulations of turbulent channel flow. P. J. MASON and N. S. CALLEN 439

Circulation measurements and vortical structure in an inlet-vortex flow field. H. W. SHIN, E. M. GREITZER, W. K. CHENG, C. S. TAN and C. L. SHIPPEE 463

Stationary, transcritical channel flow. JOHN W. MILES 489
